An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Smith on August 1, 2006.

In claim 16, last line, "catalyst." has been deleted and the phrase - - catalyst, for initiating a reaction between the steam and powder metal hydride. - - has been substituted therefor.

The following is an examiner's statement of reasons for allowance: It is well-known to produce hydrogen by reacting a metal hydride with water. (See, for example, EP 1,170,249, particularly the Abstract.) EP 1,170,249 discloses at col. 26, lines 27-33 that the catalyst for the reaction can be supported by various methods, such as on a honeycomb monolith. However there is no teaching, disclosure or suggestion in EP 1,170,249 (or any other prior art) to employ a mixing device which comprises a screw drive transporter coated with a catalyst for initiating the reaction between the steam and metal hydride. Nor would there be any motivation from the prior art to do so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
